## Q88 LLC Opens a New Office in Poland

Stamford – 25 March 2019 – Q88 LLC, the leading SaaS technology provider to the maritime industry, announced today that it has opened a new office, dedicated to expanding the software development department, in Kraków, Poland. The new location will be critical to accommodating our continued growth driven by enhancing our existing products and developing new ideas to serve the industry.

“By having an office in eastern Europe, we have extended the availability of technical resources to address questions and issues brought to us by our global audience. Kraków is home for several global technology companies and the university center in Poland where there are approximately 200,000 students. Therefore, this was an ideal location which grants access to both experienced and new talent trained in the latest technologies” says Stephen P. Dudzic, VP of Information Technology at Q88 LLC.

The office is already operative with three employees and a fourth starting in June. In the first year of operation we are expecting the Poland office to have between 5 and 10 dedicated team members, who are trained in all aspects of our solutions and embrace our culture of customer focused service.

### About Q88 LLC

Q88 LLC is the platform used by shipping professionals to conduct business. Founded in 2001, Q88 LLC is the leading SaaS technology provider to the maritime industry. Q88’s mission is to make the global shipping industry more open and connected. People use Q88 products to share information and work collaboratively, to access disparate information, and to turn static data into powerful insights. We believe that with the right technology guiding the right people, the possibilities are endless.
