

## Extend connectivity to the vessel.

Designed to enhance communication between shipowner, the central office and onboard officers, Q88 Onboard provides the ability to review, update and manage pertinent vessel data in real time throughout a voyage. As an integrated, cloud-based solution, **Q88 Onboard** delivers the connectivity necessary to maintain visibility at all times and elevate decision making.

## Access timely information all the time, **even at sea.**

Q88 Onboard guarantees that all of your stakeholders, even those on the vessel, have access to the same, up-to-date information. **Here's how we make it happen:**

- **Access information on-demand** with a secure, cloud-based solution.
- **Automatically complete questionnaires** directly onboard the vessel.
- **Keep certificates and documents updated** with centralized access from anywhere.
- **Update inspections as they happen**, maintaining timely and accurate data.
- **Give your tanker fleet access to the latest regulatory, cleaning, and safety information** with Marpol Annex 1 Commodity cargo properties.
- **Input up-to-date crew information** with a charterer-compliant Officer Matrix.

### The clients we are proud to serve:

**Q88 Onboard** is available as an add-on for:
